Project Name	Smart Lender (Loan Approval Prediction)
Maximum Marks	5 Marks

Problem-Solution Fit Template

Problem-Solution Fit Canvas aligning customer needs with Smart Lender's features.

Customer Segment / Pains & Gains	Smart Lender Value Proposition / Features
Pain: Long wait times (days or weeks) for loan officers to review physical application files.	Pain Reliever: Automated prediction system processing applicant inputs and delivering a decision in under 1.5 seconds.
Pain: Subjective assessment or inconsistencies in credit evaluations by different bank branches.	Pain Reliever: Standardized Random Forest classifier evaluates all applicants strictly based on mathematical models.
Gain: Access to credit to purchase assets (houses, cars, business equipment).	Gain Creator: Direct feedback on credit status helping applicants quickly align their financial profiles (e.g. improving Credit History).
Customer Job: Submitting financial parameters and waiting for loan availability results.	Project Feature: Clean Web form mapping 11 inputs directly to Scikit-learn features for real-time model evaluation.
